As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more opportunities to widen our knownledge in web developing world.

We also thank you so much for your infomation and the "demo" project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 07.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website sells plastic bottles, offering a variety of sizes and designs to meet both personal and industrial needs. The bottles are made from safe, durable materials, ensuring reliability and user-friendliness.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back *eprojects@aptech.ac.in* as the assigned schedule.

Design Plan:	Document Name:	SWD/Form No.01/PD/Ver1.0.	
PolySite	Problem Definition		
Effective Date:15-01-2025	Version 1.0	Page No: 2 of 35	

Problem Definition

PolySite is a company specializing in the production, supply, and export of various types of PET, PP, and PC bottles used in diverse industries such as packaged drinking water, household chemicals, pharmaceuticals, cooking oil, alcohol, hair care, and pesticides. To enhance their online presence and streamline interactions with customers, PolySite requires a comprehensive website that effectively showcases their products and services.

We need to design a SPA and responsive website with the following criteria:

- 1. User-friendly, where customers can easily navigate through product categories, view detailed specifications and pricing, browse a collection of images, provide feedback, and access contact information. Additionally, the website will allow users to download detailed product descriptions in PDF or DOC.
- 2. The website consists of a set of pages and menus that represent the choice of activities to be performed. Pages, menus, and other visual elements must be designed in a visually appealing way with attractive fonts, colors, and animations. All of these should also be presented in a responsive manner.
- 3. The menu is well-designed with necessary submenu options.
- 4. Consistent color scheme throughout the website.
- 5. Smooth navigation across all pages

The structure, interface, and functionality of the website

- 1. Home page:
 - Display the company logo.
- Include a navigation bar with: Home, About Us, Products, Services, Gallery, Contact Us, Feedback.

PolySite	Problem Definition		
Effective Date:15-01-2025	Version 1.0	Page No: 3 of 35	

- Include a brief introduction with a "see more" button that navigates to the About Us page.
- Contains a type of bottle along with a representative image; clicking on the image will navigate to the corresponding bottle page in Products.
- Contains information about various services offered by PolySite to attract potential customers and partners (including images, service names, and a navigation button to the detailed page).
- Contains a footer divided into 4 sections with the following information: Headquarters, Branches, Google map (occupying 2 sections)

2. About Us

- Information about PolySite, its history, mission, and values.

3. Products

- Detailed pages for different bottle categories with images, specifications, and pricing information.
- Includes a download button: an option for users to download the full product description as a PDF or DOC file for offline access.

4. Services

- Information about the various services offered by PolySite to attract potential customers and partners.

5. Library

- A visual display room showcasing various bottles and packaging solutions offered by PolySite.

Customer Requirements Specifications

User:

input:

- Provide feedback on the experience of using the website, including any issues encountered and suggestions for improvement.
- Use search engines to find information and products, thereby generating user behavior data.

Process:

- Send customer feedback to the repository
- Search for products according to the information provided by customers in the system

Output:

- Popup responds successfully
- Show products that look like potential customer information

	Prepared by (Student)	Approved by (Faculty)

Webmaster:

Input:

- Collect access data from Google Analytics and Search Console
- Gather server logs and system data
- Collect information from SEO tools and CRM
- Gather feedback from users

Process:

- Process data from Google Analytics and Search Console
- Process server logs to detect errors and security issues
- Process SEO data to optimize content and improve search rankings
- Process user feedback to enhance website experience and interface

Output:

- Generate performance reports on user access and behavior to enhance website operational efficiency.
- Export a list of keywords and content that need optimization.
- Export security error alerts and a remediation plan.
- Export charts and reports for visualizing SEO data.

Polyethylene Terephthalate (PET) is one of the most widely used plastics in the production of bottles, especially for beverages, bottled water, and food packaging. Due to its lightweight, strong, and flexible nature, PET has replaced other materials for many applications. However, in recent years, concerns about its safety, particularly in relation to human health and environmental impact, have grown.

The Advantages of PET

PET is favored in the packaging industry because of its durability, resistance to breaking, and cost-effectiveness. It is also easy to recycle, which has made it a more sustainable option compared to other lastic materials. Many consumers are familiar with PET bottles used for drinks, but what many don't realize is the significant impact PET may have when exposed to certain conditions.

Safety Concerns with PET

Despite being deemed safe by regulatory bodies like the FDA for use in food and beverage packaging, studies have raised concerns about the long-term health risks of PET. Prolonged exposure to high emperatures, sunlight, or reusing PET bottles may lead to the leaching of chemicals such as antimony (a toxic metal), which could potentially contaminate the beverages stored within the bottles.

What Are the Risks?

When PET is heated or exposed to sunlight, it can degrade over time, and chemicals might be released. Antimony, one of the chemicals involved, is considered hazardous, especially in larger quantities. While
